PennHIP Report

Referring Veterinarian: Dr Robert Allen Clinic Name: Family Veterinary Center Email: info@famvets.com

Clinic Address: 99 Main Street Haydenville, MA 01039

Phone: Fax:(413) 268-3899

Patient Information

Date Submitted: 21 Feb 2023

 Client: Miller, Judy
 Tattoo Num:

 Patient ID: 3492-3
 Reg. Name:

 PennHIP Num: 185294
 Microchip Num: 956000005831562

 Breed: GOLDEN RETRIEVER
 Date of Birth: 01 Aug 2019

 Sex: Male
 Weight: 71.2 lbs/32.3 kgs

Registration Num: Species: Canine Age: 42 months Date of Study: 21 Feb 2023

Patient Name: Charlie

Findings

Distraction Index (DI): Right DI = 0.55, Left DI = 0.30.

Osteoarthritis (OA): No radiographic evidence of OA for either hip. Cavitation/Other Findings: No cavitation present.

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.55.

Date of Report: 22 Feb 2023

OA Risk Category: The DI is between 0.50 and 0.69. This patient is at moderate risk for hip OA. Distraction Index Chart:

GOLDEN RETRIEVER

**Distraction Index** 

BREED STATISTICS: This interpretation is based on a cross-section of 25429 canine patients of the GOLDEN RETRIEVER breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.32 - 0.79) for the breed. The breed average DI is 0.53 (solid square). The patient DI is the solid circle (0.55).

**SUMMARY:** The degree of laxity (DI = 0.55) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a moderate risk to develop hip OA. No radiographic evidence of OA for either hip.
